Why learn Spanish?

IT OPENS DOORS

Spanish is the official language in over 22 countries. More than 426 million people speak Spanish worldwide and 535 million are forecasted to speak it by 2030. The US will become the top Spanish speaking country in 2050.

Spanish is one of the most important languages used in international business and political forums and it is an official language of the EU, MERCOSUR, UNESCO, the UN, GATT, ONUDI & U.I.T.

In the globalized world, Spanish companies are finding great opportunities. They are increasingly international and are becoming more and more influential all over the world.

PERSONAL AND PROFESSIONAL GROWTH

Learning Spanish supports the development of your personal and professional skills. Spanish is globally recognized in the business world, as negotiations and trade agreements in both hemispheres rely increasingly on the use of Spanish.

A PASSIONATE CULTURE: GARCÍA MÁRQUEZ, GAUDÍ, ALMODÓVAR, NADAL...

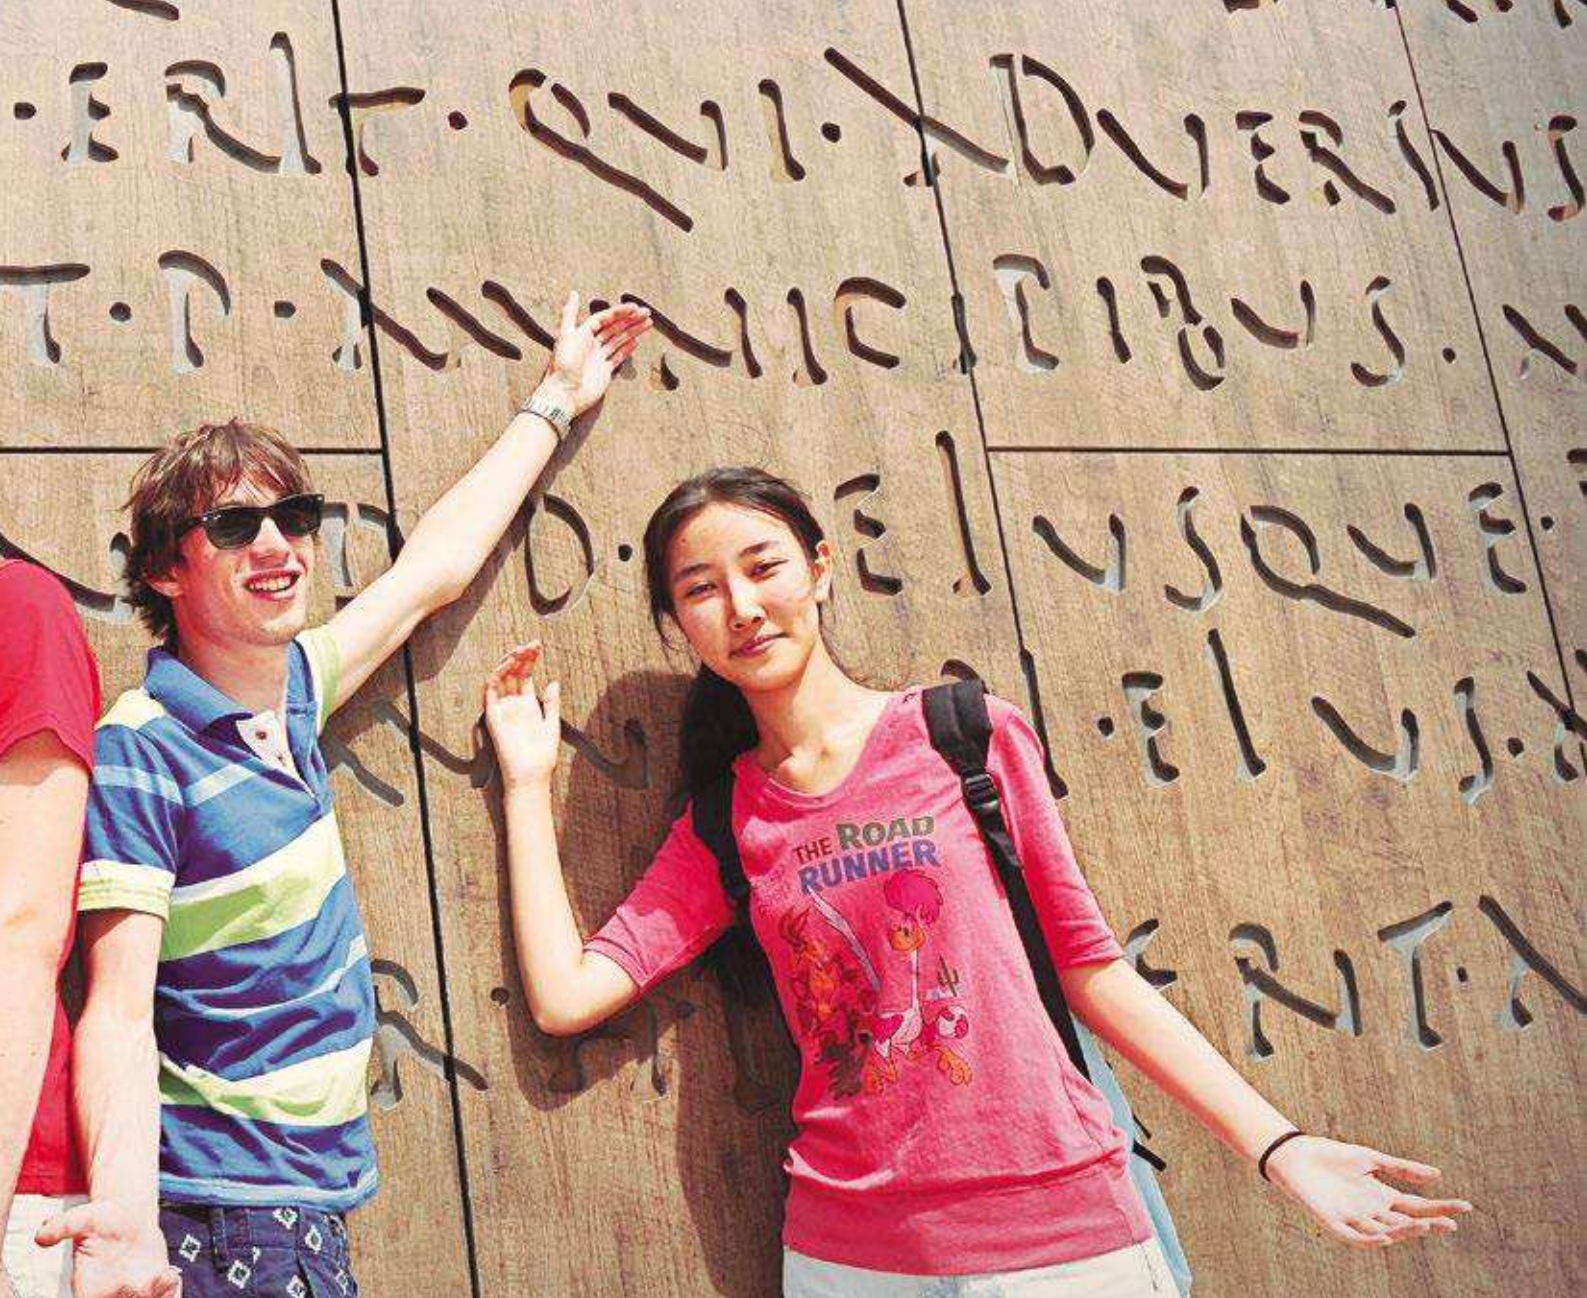

Both in Spain and Latin America, locals are open, warm and more than happy to share. Social life is important and you'll experience the excitement of exploring museums, tapas bars and amazing landscapes with native Spanish-speaking friends.

BUSINESS IN SPANISH IN LATIN AMERICA

Economies in Latin American countries have emerged as key players in recent years. International business centers like Chile, Colombia and Panama, among others, have become important meeting points for trade relations with North America, Europe and Asia.

Knowing how to speak Spanish is, without a doubt, the best tool for any professional to be able to better relate to the local culture, delve deeper into business initiatives, and to be able to build stronger ties to Latin American economies and companies.

Moreover, a good understanding of Latin American countries and cultures will open the door to building strong personal relationships, the best way to understand the wants and needs of customers in these markets.
